Projects / Practical Work

- Event-Nest (Event Management Website)** (<https://meenamurali1217-dot.github.io/makeMyEvent/>)
 - **Event Nest** is a platform that connects customers with trusted vendors for all types of events in one place. It helps users easily find, compare, and book services like catering, decoration, and photography. With a focus on convenience and reliability, Event Nest makes event planning simple, fast, and stress-free.
Technologies: HTML, CSS, JavaScript
Tools: VS code, GitHub
- Calculator Web App** (<https://calculater-with-js.netlify.app>)
 - Developed a Calculator Web Application using HTML, CSS, and JavaScript as part of my hands-on learning in JavaScript. This project helped me understand core concepts such as DOM manipulation, event handling, functions, and conditional logic by implementing real-time arithmetic operations.
- Healthcare** (<https://meenamurali1217-dot.github.io/Day-4/>)
 - I developed this task completely using manual coding without relying on AI tools. This helped me strengthen my understanding of HTML structure, CSS styling, and basic JavaScript logic. I focused on writing clean code, organizing sections properly, and making the UI functional within the given time.
